

Publications Reissue Highlights

Manual: *ACI Desktop User Interface Manual*

Number: CF-CS000-01ES

Date: Dec-2006

Software: Release 1.0, version 06.4

The following major changes have been made to this version of the manual for December 2006:

Section/ Appendix	Major Changes
----------------------	---------------

-
- | | |
|---|---|
| 1 | Information about messages in the Status Pane has been updated to show that left and right clicks in the pane provide additional message information.

Added information about the “LOGGING SENSITIVE DATA” message that is conditionally displayed in the Application Area of the desktop. |
| 2 | Added information about the “LOGGING SENSITIVE DATA” message that is conditionally displayed in the Application Area of the desktop. |
| 3 | Updated PCI password information. |
| 4 | Added information about the new User Status and User Permission windows located on the View menu. These windows are available to authorized users to view summary user security information.

Clarified that field filtering is currently only implemented for Institution ID and Issuer ID fields. |
| 5 | Updated information about minor changes to the audit report wizard. This function has moved to the View menu of the desktop. |
| A | Added new information for each ACI desktop window and reformatted and organized the information alphabetically by window name. The window information now consists of the task ID, permissions, help ID, impacted data sources (<i>new</i>), ACI desktop menu access information, and server messages (<i>new</i>). |
