

Publications Reissue Highlights

Manual: *ACI Desktop User Interface Manual*

Number: CF-CS000-01ES

Date: Dec-2005

Software: Release 1.0, version 05.4

The following table highlights the major changes that have been made in the most recent update to this user guide.

Section/ Appendix	Major Changes
n/a	The manual was reorganized and modified to make it generic for use by other ACI product applications, such as ACI Payments Manager. Product specific information will be added as necessary to appendices. The following two sections were removed from the manual: - General Procedures (formerly section 3 in version 05.2) - Contingency SAF Processing (formerly section 7 in version 05.2)
5	Added information about automatic user audit reporting.
7	Updated online help information to reflect changes to JavaHelp packaging and delivery.
A	Added information for the following new windows: - BNTng Key Header Configuration - Interpay (BIM) Interface Configuration (partial information) - IFX Host Action Code Profile Configuration - IFX Host Interface Configuration - LNK LIS5 Interface Configuration - Terminal Logical Network/FIID Mapping - Token Profile Configuration - Visa Acquirers Configuration The Integrated Server Event Configuration and Management window is now named Event Configuration and Management. The AIB Interface Configuration window has been removed.
B	Updated task ID information for the window changes in appendix A.
C	Updated Permission ID information for the window changes in appendix A.
