

Publications Reissue Highlights

Manual: *ACI Desktop User Interface Manual*

Number: CF-CS000-01ES

Date: Jun-2008

Software: Release 1.0, version 08.2

The following table highlights the major changes that have been made in the most recent update to the *ACI Desktop User Interface Manual*. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix. These changes update the manual to release 1.0, version 08.2.

Section/ Appendix	Major Changes
2	Clarifies information about the Change Password dialog box. This dialog box will not be available when you are using a third-party authenticator other than the one provided with this application. Updates illustrations depicting the desktop version information.
3	Clarifies information regarding USEC 1.1 and 1.2 modes. Field filters are associated with permissions in USEC 1.1 mode (the BASE24-eps default), whereas USEC 1.2 mode enables you to associate filters to user profiles. Clarifies information about disabling the user status when the user exceeds the allowed number of failed logon attempts. Clarifies information about the Verify Password dialog box that displays when a UI timeout occurs and clarifies the difference between the Verify Password dialog box and the Bad Logins Allowed field. Clarifies information about the Add button on the User Security Role Configuration window. This button and the related text box are visible only when debugging is enabled and usage is intended for ACI only. Clarifies information about the Filters tab of the User Security Role Configuration window, which is documented under Step 3.1: Configure Field Filters. The range, single value, and multi-value options are no longer used and several field names have changed, including replacing the Field ID field with the Filter Type field. In addition, you can use the Available Values and Assigned Values fields to move one or more values.

Section/ Appendix	Major Changes
----------------------	---------------

-
