

Publications Reissue Highlights

Manual: *ACI Desktop User Interface Manual*

Number: ES-CS000-01

Date: 05/2005

Software: Release 1.0, version 05.2

The following table highlights the major changes that have been made in the most recent update to this user guide.

Section/ Appendix	Major Changes
All	Updates and clarifications per feedback and edits received since the previous release.
2	Added new general preference information.
4	New section, User Configuration, provides an overview of User Security and has been restructured to better show how to add a user. Some of the content of this section originated from section 5 (User Security) of the 04.4 version of the manual.
5	New section, User Management, provides information about managing and controlling existing users. The content of this section originated from section 5 (User Security) of the 04.4 version of the manual.
4/5	In summary, the previous User Security section is now two sections: User Configuration (section 4) and User Management (section 5).
9	The section on online help has moved from section 4 (for version 04.4) to section 9. The section has been updated to reflect the changes to JavaHelp file names and packaging.
A	New windows are documented. Also new, the help ID for each window is listed.
B	New task IDs are documented.
C	New permission IDs are documented.
