

Publications Reissue Highlights

Manual: *BASE24 Core Files and Tables Maintenance Manual*

Number: TB-AE000-02

Version: 4

Date: 07/2000

The following table highlights the major changes that have been made to the *BASE24 Core Files and Tables Maintenance Manual* in this version. This version of the manual adds new transactions for BASE24-telebanking release 1.3. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix.

Section/ Appendix	Major Changes
All	Changes NET24 to BASE24 in all references to Integrated Transaction Services (ITS) manuals.
3	Updates the default Customer Allowed Transaction Table (CATT) rows to include the following new transactions available in release 1.3: • Statement closing download • Statement download • Check stop payment add Updates the inquiry transactions discussion for new or revised fields on Host Configuration File (HCF) screen 23 and VRU Configuration Data (VCD) screen 18.
13	Updates the default Processing Code Definition File (PCDF) records to include the new transactions available in release 1.3. Updates routing restrictions for BASE24-telebanking transactions that can only be authorized on a host and BASE24-billpay transactions that cannot be routed to a host for authorization.
15	Updates the default Transaction Type by Source Code Table (TTSC) rows to include the new transactions available in release 1.3.
16	Updates maximum count fields on VRU Configuration Data (VCD) screen 18 and adds new maximum count fields for the statement closing download and statement download transactions.
