

Publications Reissue Highlights

Manual: *BASE24 Release 6.0 Version 9 Implementation Guide*

Number: BA-AE010-09

Date: Apr-2009

Software: Release 6.0, Version 09

The following table highlights the major changes that have been made in the January and April, 2009 updates to the *BASE24 Release 6.0 Version 9 Implementation Guide*. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix. These changes update the manual for release 6.0, version 9.

Section/ Appendix	Major Changes
----------------------	---------------

- | | |
|---|--|
| 4 | Changes the Version number of SKELB required for XPNET 3.1 from Version 09 to Version 10 on page 4-16. XPNET 3.1 requires Version 10 or greater of SKELB to support the general PCI – Event and Trace Messages enhancement. (Jan-2009)

Removes the base_lmcf_on flag from the CUSTMACS Changes subsection on page 4-18 and replaces the contents of this subsection with “Not applicable.” (Apr-2009) |
| 5 | Removes the details of the ATD conversion program from page 5-7 and updates the description of the TDF conversion program on page 5-7 to correct the subvolume names used. (Jan-2009)

Changes PS60TN50.TN50NAMS to AT60TN50.TN50NAMS on page 5-29. (Apr-2009) |
| C | Updates the list of enhancements that have CUSTMACS impacts on page C-3. The PCI - Event and Trace Messages enhancement is being removed from this list due to the elimination of the base_lmcf_on flag from page 4-18 (above). (Apr-2009) |
