

## Publications Reissue Highlights

**Manual:** *BASE24 Remote Banking Standard Interface Support Manual*

**Number:** TB-DT100-01

**Version:** Version 2

**Date:** 09/2000

The following table highlights the major changes that have been made to the *BASE24 Remote Banking Standard Interface Support Manual* in this version. This version of the manual adds new transactions for BASE24-telebanking release 1.3. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix.

| Section/<br>Appendix | Major Changes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| All                  | Adds support for the following new transactions: statement download (3R), statement closing download (3Q), and check stop payment add (A0).                                                                                                                                                                                                                                                                                                                                                  |
| 1                    | Updates the maximum number of items that can be returned in each response message for several inquiry transactions.                                                                                                                                                                                                                                                                                                                                                                          |
| 4                    | Removes the tables of data element requirements by message type. Detailed descriptions of the data elements used for each transaction message are now listed in the <i>BASE24 Remote Banking Standard Interface Message Specifications</i> . This manual lays out the message format for each message that can be exchanged between BASE24 Remote Banking and an RBSI-compliant device. This manual is intended for software engineers responsible for programming an RBSI-compliant device. |
| 5                    | Adds function code 973 to P-24, Function Code.<br><br>Adds redefines to P-48, Additional Data, Private, for the three new transactions.<br><br>Adds text descriptions to fields in data element layouts.<br><br>Maps data elements to and from Internal Transaction Data (ITD) for incoming and outgoing messages.                                                                                                                                                                           |
| 6                    | Adds redefines to S-125, Transaction Data, Private, for statement download and statement closing download response data.<br><br>Adds text descriptions to fields in data element layouts.<br><br>Maps data elements to and from Internal Transaction Data (ITD) for incoming and outgoing messages.                                                                                                                                                                                          |

| <b>Section/<br/>Appendix</b> | <b>Major Changes</b> |
|------------------------------|----------------------|
|------------------------------|----------------------|

- 
- |   |                                                                                                                                                                          |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| C | Adds the restriction that the check stop payment add, statement download, and statement closing download transactions must always be routed to a host for authorization. |
| D | Adds new recommended transaction sequences for stopping payment on a check or range of checks and downloading statement information.                                     |
