

Publications Reissue Highlights

Manual: *BASE24 Remote Banking Transaction Processing Manual*

Number: TB-AE000-07

Version: 4

Date: 07/2000

The following table highlights the major changes that have been made to the *BASE24 Remote Banking Transaction Processing Manual* in this version. This version of the manual adds new transactions for BASE24-telebanking release 1.3. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix.

Section/ Appendix	Major Changes
All	Changed NET24 to BASE24 in all references to Integrated Transaction Services (ITS) manuals.
1	Adds the following three new transactions supported in this release to the default transaction codes: • Statement closing download (3Q) • Statement download (3R) • Check stop payment add (A0) Clarifies the topic “Large Message Support.” Adds a list of transactions that require large messages and separates this list from the list of transactions that can use either large or small messages.
3	Updates the authorization level and authorization method discussions for the three new transactions. Updates the topics “Transaction Logging” and “Discarding of Nonfinancial Reversals” for the new transactions.
4	Adds an additional step for Transaction Security object processing throughout the message flows. This step illustrates how the PIN capture flag in the point of service information of the message impacts PIN verification processing.
6	Adds Personal Information Table (PIT) impacts for customer add and customer update transactions.
