

Publications Reissue Highlights

Manual: *BASE24 Transaction Security Services Processing Guide*

Number: BA-AE000-14

Date: Apr-2010

Software: Release 6.0, Version 10 (TSS Release 09.2)

The following table highlights the major changes that have been made in the most recent update to the *BASE24 Transaction Security Services Processing Guide*. The first column of the table lists the sections and appendixes in which major changes have been made. The second column of the table describes the major changes for each section or appendix. These changes correct the guide for BASE24 release 6.0, version 10 (TSS Release 09.2).

Section/ Appendix	Major Changes
----------------------	---------------

All	Removes all references to DUKPT message field data encryption. DUKPT message field data encryption is not supported by the Transaction Security Services process in product.
3	Corrects the description of the ATALLA_CBC_DATA_FRMT Environment attribute to indicate that setting the attribute to Y causes the data buffer to be unpacked before it is sent to the Atalla NSP for translation or encryption.
